I. INTRODUCTION

The curriculum of the graduate university study programme of Clinical Physiotherapy is the result of the regular review process, which began with the Decision of the Senate at the session held on February 26, 2022 (No. 01-993-1 / 22). The regular revision procedure was carried out according to the Rulebook on the procedure of adopting new and regular revisions of existing study programmes (No. 01-993-1 / 22). It stipulates that the Committee coordinates a revised curriculum. The Committee also includes student representatives and external users, and the scientific-teaching/artistic-teaching council of the organizational unit submits their proposal to the University Senate for adoption.

In order to involve all stakeholders in the process of improving the study programme, a public hearing was held on July 14, 2022 (No. 01-1086/22).

The conclusions of the public debate were taken into account during the development of the curriculum.

In addition to the conclusions of the public debate, the recommendations of the Expert Committee from the last institutional accreditation in 2020 were taken into account. The recommendations include practical work outside the University (where applicable), application of legal and internal acts on the minimum share of pre-examination obligations in the final grade of all courses, and the application of modern teaching methods with the student at the center of the teaching process.

Also, during the development of the curriculum, all strategic tasks in the strategic area of education from the University Development Strategy 2017-2023, which relate to the curriculum and teaching process, were carried out (more in the chapter "3.1. Connection to the University Development Strategy").

In addition, when making decisions on the type of changes, all relevant statistical data and survey results collected and conducted in the period since the last revision/adoption of the study programme were analyzed on June 2, 2021 (No. 01-3666/21).

Taking into account all the above, the following changes have been made in this revised curriculum in comparison to the existing one. The changes can be classified into six categories: amendments to the mode of study (full-time/part-time), elimination of outdated/irrelevant courses for the profession and introduction of courses that contribute to the acquisition of competences and learning outcomes defined by the EU occupational standard, introduction of new compulsory and elective courses, amendments of course titles, amendments of course hours, and ECTS points.

Education is a key prerequisite for the successful work of a physiotherapist as a professional and it includes both undergraduate and graduate training (first and second cycle according to the Bologna Process). The need to approach world standards in physiotherapy, and according to the recommendations of the World Confederation for Physical Therapy (WCPT) it requires certain changes in the education system as well as the organization of the clinical work of physiotherapists.

The development of physiotherapy as a profession in Europe and the world is characterized by an increase in scope of knowledge and skills, which is why the study programmes are adapted to the modern needs of the profession and the current needs of contemporary healthcare. The aim of the study programme is the theoretical and practical education of students for independent professional work at healthcare institutions, who will engage in research work, participate in the teaching process at undergraduate studies, and be a member of the management team.

By continuing education at graduate level, the student is enabled to improve the knowledge and skills necessary for: independent and responsible implementation of the specialized field of physiotherapy according to his interests; planning, preparation and implementation of organized forms of teaching in order to transfer knowledge and skills from the field of physiotherapy; planning, preparation and implementation of research in the field of physiotherapy and acquisition of knowledge and skills necessary for planning, organizing, managing, and coordinating human and material resources in the field of physiotherapy.

2. GENERAL INFORMATION ON THE STUDY PROGRAM

Study program	Clinical Physiotherapy
Cycle	Second cycle (Master's degree)
Type	University study
Scientific area	Biomedicine and healthcare
Scientific field	Clinical Medical Sciences / Health Sciences
Academic title	Master of Physiotherapy
EQF qualification level	7
Duration of study program	2 years / 120 ECTS
Total number of ECTS credits	2 years / 120 ECTS
Language	Croatian language
Mode of study	Full time/Part time
Institution	University of Mostar
Objectives of the study program	<ul style="list-style-type: none"> - acquisition of new knowledge and skills through education and training of future masters of physiotherapy in assessment of patient's condition, planning, implementing, and evaluating physiotherapy procedures in accordance with the needs of patients and users - participation in healthcare teams and healthcare management - application of evidence-based physiotherapy - training students for health promotion in a health institution and the community - improvement of the profession through continuous education and research work - training students to apply the principles of evidence-based physiotherapy during work, as well as for continuous lifelong learning and acting as mentors and teachers
Competencies of the study program	<ol style="list-style-type: none"> 1. Planning, organization and management of human and material resources, and support systems in the field of physiotherapy, management of complex work processes 2. Management of the quality system, participation in coordination of the healthcare team and management of physiotherapy documentation 3. Use of information technologies and databases for the purpose of improving professional knowledge and skills, and participation in scientific research work 4. Participation in the education of pupils and students of physiotherapy and related professions 5. Planning and creating physical therapy procedures according to the instructions of a specialist doctor and using physical agents for the purpose of treatment according to the principles of evidence-based medicine 6. Participation in the organization and application of physiotherapy assessments and procedures in hospitals, rehabilitation centers, clinics, sports and recreation centers, schools, and kindergartens 7. Planning, implementation and improvement of the physiotherapy program and various physical therapy techniques 8. Planning, organization and preparation of premises for medical

	<p>and other equipment</p> <ol style="list-style-type: none"> 9. Application of effective communication skills with the patient/user and his family, and with other members of healthcare, therapy and rehabilitation teams 10. Acting according to the principles of professional ethics and legislation
<p>Learning outcomes of the study program</p>	<ol style="list-style-type: none"> 1. Manages department, clinic and institution resources and support systems in the field of physiotherapy (FZSKFM-IU-1) 2. Manages the system of quality control and supervision of physiotherapy care (FZSKFM-IU-2) 3. Manages the work of a physiotherapy team (FZSKFM-IU-3) 4. Maintains physiotherapy documentation (FZSKFM-IU-4) 5. Organizes education for advancing knowledge on physiotherapy (FZSKFM-IU-5) 6. Participates in scientific research work (FZSKFM-IU-6) 7. Educates students of physiotherapy and related professions (FZSKFM-IU-7) 8. Applies the skills of effective communication with patients and their family members as well as staff and colleagues (FZSKFM-IU-8) 9. Supervises the implementation and application of methods and measures of disinfection and preparation of physiotherapy facilities and devices (FZSKFM-IU-9) 10. Tailors communication according to the needs of audience and situation (FZSKFM-IU-10) 11. Recognizes the needs of patients and their family members as well as staff and associates (FZSKFM-IU-11) 12. Manages the work process in accordance with the needs of the work organization (FZSKFM-IU-12) 13. Uses a computer for the purpose of performing work tasks and communicating with patients and associates (FZSKFM-IU-13) 14. manages personal and professional development (FZSKFM-IU-14) 15. Plans, implements and evaluates physiotherapy interventions in all branches of clinical medicine, taking into account indications and contraindications for the use of physical procedures in physiotherapy, and contributes to the development of quality provision of physiotherapy services through continuous improvement of knowledge and skills in the profession according to the principles of evidence-based medicine (FZSKFM-IU-15) 16. Plans, implements and evaluates physiotherapy interventions in all branches of clinical medicine, according to established programs, rules and protocols of rehabilitation teams (FZSKFM-IU-16) 17. Manages and participates in the organization and application of physiotherapy assessments and procedures in hospitals, rehabilitation centers, clinics, sports and recreation centers, schools, kindergartens, work organizations, and in the home of the patient/service users (FZSKFM-IU-17) 18. Educates patients to perform daily life activities and professional

	<p>orientation activities in accordance with the diagnosis (FZSKFM-IU-18)</p> <p>19. Acts according to the principles of professional ethics and legislation (FZSKFM-IU-19)</p> <p>20. Participates in the preservation of individual and community health and promotes a healthy lifestyle (FZSKFM-IU-20)</p>
Opportunity after graduation	<p>Upon successful completion of their studies, students have the opportunity to work in public and private healthcare institutions and / or continue their education in doctoral studies.</p>
Accreditation	<p>The University of Mostar received a Decision on Institutional Reaccreditation on 14 January 2020 from the competent Ministry of Education, Science, Culture and Sports of the HNŽ on the recommendation of the Agency for Development of Higher Education and Quality Assurance of B&H, after which the University was registered in the State Register of Accredited Higher Education Institutions.</p>

3. CHARACTERISTICS OF THE STUDY PROGRAM

3.1. Correlation with the University development strategy

In the *Development Strategy of the University of Mostar 2018 - 2023* in the strategic field of education, several strategic goals are related to the curriculum and its elements.

Objective 1 defines that the University, in cooperation with stakeholders, will develop, approve, implement and continuously monitor and improve study programmes at all levels. The following tasks arise from clearly defined learning outcomes related to labour market needs, following the European Qualifications Framework (EQF):

- Task 1: clearly define the objectives and anticipated learning outcomes of each study programme and harmonize the content of the study programme with them, following the appropriate level of the European Qualifications Framework and the qualification standard
- Task 2: Introduce a transparent and consistent process of revision and improvement of study programmes with the participation of students and other stakeholders
- Task 5: ensure realistic allocation of ECTS credits, through a defined system of ECTS coordination at all study levels
- Task 6: improve the interdisciplinarity of all study programmes by enabling elective courses at the university level.

Objective 3 refers to the development of a wide network of teaching bases, including organizations from different fields of activity, to establish cooperation that will enable the connection of practice, science, art, and higher education. The following tasks arise from it:

- Task 2: increase the number of hours and the share of teaching practice in the study programmes and the share of ECTS credits acquired by it
- Task 3: increase the number of bachelor/master papers related to the topic and content.

Key strategic postulates of the Faculty of Health Studies that lead to realization of the vision while respecting the mission and academic values of the University are modern study programmes that will be directed towards the development of a wide range of competencies, as well as education and activities that will be directed towards the development of the economy, society and culture.

University studies at the Faculty of Health Studies of the University of Mostar enable the establishment of a system of continuous training, refresher training and acquisition of latest cognitions, as well as constant monitoring and recognition of the priorities of healthcare needs in the country and the European environment. At the second level (graduate study), education is focused on training students for teamwork, planning processes, projects, decision-making and leadership, alongside the evaluation process, as well as additional specialist skills and knowledge in the chosen fields. A special strategic goal is training for teaching work and new educational methods, and it includes a two-year education with a load of 120 ECTS-points, after which the title of master's degree is obtained.

3.1. Corelation with scientific/artistic achievements of certain scientific fields and labor market and correlation with occupational/qualification standards

Objectives, competencies, and learning outcomes at the level of the study programme are defined in a way that is in line with the achievements of a particular Biomedicine and healthcare area and labour market and related to the standards profession. To harmonize with the achievements of the particular Biomedicine and healthcare, the representatives of teachers in the Committee for the development of the revised curriculum and other teachers who participated in the development of syllabi for each course took into account current achievements and trends in scientific area Biomedicine and healthcare, field Clinical Medical Sciences / Health Sciences branch to the university graduate study programme of Clinical Physiotherapy.

Also, student representatives and external users were appointed to the Committee for the development of the revised curriculum to harmonize with the labor market. Public hearing was organized with the participation of experts from practice and economics, and their suggestions were taken into account in the development of the curriculum.

Since no occupational standard or qualification standard has been defined at any level in B&H, the following documents have been taken into account:

- Professional competencies physiotherapists, advanced physiotherapists and physiotherapist assistants esco Professional definitions + ENPHE recommendations [Internet]. Available from: <https://ec.europa.eu/esco/portal/home>
- Bolonjska deklaracija 3 + 2 (*Bologna Declaration. The European Higher Education Area. The Bologna Declaration, a joint declaration of The European Ministers of Education convened in Bologna 19 June 1999. Available from: <http://www.ond.vlaanderen.be/hogeronderwijs/>*).
- Goal 18 WHO – development of human resources in healthcare till 2010
- Healthcare for all in 2021, WHO
- *Confederation of EU Rectors' Conferences and the Association of European Universities. The Bologna Declaration on the European space for higher education: an explanation. Available at: <http://ec.europa.eu/education/policies/educ/bologna/bologna.pdf>.*
- *Joint declaration on harmonisation of the architecture of the European higher education system Paris, Sorbonne, 1998. Available at: http://www.bologna.org.gu.se/digitalAssets759/759802_Sorbonnedeklarationen1998.pdf. Accessed.*
- The Decision of the Council of Ministers of Bosnia and Herzegovina on the Adoption of the Road Map for Implementation of the EU Directive 2005/36/EC and 2013/55/EU on Regulated Profession (Official Gazette of B&H, no. 10/16),
- Law on Healthcare (Official Gazette of the Federation of B&H No. 41/10 and 75/13)
- Rulebook on Amendments to the Rulebook on internship and professional examination of healthcare workers (Official Gazette of the Federation of B&H No. 99/21),
- Rulebook on internships and professional exams for health professionals (Official Gazette of the FB&H, 51/17)

Jobs/competencies/learning outcomes from all the above documents are implemented in the competencies and learning outcomes at the level of the study programme listed in chapter "2. General information about the study programme". They are realised in core courses, in order to ensure that all students achieve them with the acquired qualification. The coverage of these learning outcomes at the level of the study programme with the learning outcomes at the level of core courses is presented in the chapter "3.12. Matrix of learning outcomes".

3.3. Comparability with study programmes in the country and abroad

Study programme performed at the university graduate study programme of Clinical physiotherapy department and the development of physiotherapy as a profession are in line with European standards, and the study programme is based on close cooperation with other institutions of a similar profile in the Republic of Croatia. Comparability is reflected exclusively in the competencies and learning outcomes at the level of study programmes and in the duration of studies, while the study programme retains its specifics mainly through the structure, course names, and ECTS credits.

3.4. Openness to Student mobility

Student mobility is defined by the Rulebook on international mobility, which refers to administrative support for students, student mobility documents, insurance, method of application, the procedure for recognizing mobility and information package. The unique recognition methodology is defined at the university level by the Senate Decision on the adoption of a single form for the Decision on recognition of courses, ECTS credits, grades, and professional practice during student mobility, which is recorded in the diploma supplement. Students can find

information on mobility programmes and accompanying forms on the University's website and through the Vice Dean for Quality and Inter-Institutional Cooperation who forwards information from the International Office to student representatives.

3.5. Conditions for enrolment in the study programme and transfer from other study programmes

The Rulebook on Study of the University of Mostar defines the right to enroll in undergraduate, graduate, and integrated study programmes, which is done through a public competition. The Senate, at the proposal of the scientific-teaching / artistic-teaching council of the organizational unit, and with the consent of the Governing Board of the University and the competent Ministry of Education, Science, Culture and Sports of the Herzegovina Neretva County, announces a public tender. It is published on the website and bulletin board of the Faculty of Health Studies, which contains information on the conditions for enrolment, entrance examination, tuition fees, criteria for selecting candidates, and other information. When transferring from other study programmes, a request is submitted to the dean Faculty of Health Studies, and the appropriate committee decides on the possibilities and conditions for enrolment.

3.6. Conditions for enrolment in the next semester and year of study and graduation

Conditions for enrollment in the next semester and year of study are defined by the Rulebook on Study of the University of Mostar and the general act of the Faculty of Health Studies.

The study program is completed by writing and defense of thesis worth 13 ECTS credits. The procedure of the defense and thesis's methodology are defined by Rulebook on Study of the University of Mostar and the general act of the Faculty of Health Studies.

3.7. Organization of the study programme

The study is organized as a two-year study for a total of four semesters. Classes are organized in a block system, and detailed schedules are disclosed per semester and study group. In accordance with the principles of the Bologna Declaration, the proposed study program is structured and evaluated with ECTS credits. Study programs are divided into study years and semesters. . In accordance with ECTS credits, one academic year of the study program is worth 60 ECTS, or 30 ECTS credits for one semester. Students can study as full-time or part-time students. Full-time students are those who study according to the full-time teaching schedule. Part-time students are students who attend the study program while working or doing another activity. Part-time students should attend at least 50% of lectures and seminars (of their choice) and do exercises in the scope specified for part-time students.

3.8. Structure of the study programme

The structure of the study programme is reflected in the number of hours of each type of teaching and teaching in total, the number of hours of practice, and the number of hours of independent student work in the total student workload of 3600 hours. According to the Rulebook on the procedure for adopting new and regular revisions of existing study programmes (No. 01-993-1/22), only core courses are listed in the curriculum, while electives are adopted in the annual curriculum for each academic year. Therefore, the table will show the number of hours of each type of teaching and teaching in total, the number of hours of practice, and the number of hours of independent work only in core courses.

In relation to the total number of ECTS credits, a sum of ECTS credits acquired in elective courses is 10 ECTS, and the student can choose a total of 5 elective courses. Besides core and elective courses at the level of the study programme and at the level of organizational unit, i.e., in addition to 30 ECTS credits per semester, a student can choose university elective courses from the list adopted by the Senate each academic year, which are recorded in diploma supplement.

The purpose of elective courses at the study programme level is a more detailed elaboration of learning outcomes already acquired in core courses but following student preferences. The purpose of university elective courses is

to acquire competencies not provided by the study programme, but that can help students achieve competitiveness in the market and contribute to building one's personality through education.

Table 3.8.1 Representation of teaching load, hours of theory and practice, and the share of workload in the graduate university study programme of Clinical Physiotherapy

Form of teaching	1st year	2nd year	Total	%
Lectures	210	190	400	11%
Seminars	215	270	485	13%
Practicals	305	125	430	12%
Independent work	1070	1215	2285	63%
Total	1800	1800	3600	100%

In the two years of the graduate university study of Clinical Physiotherapy there are active classes and independent student work of 3600 hours. Student independent work of 2285 hours includes the time a student needs for independent study of the subject, preparation of seminars, mid-terms, final tests, preparation and writing of graduate theses, not counting contact hours with the teacher (lectures, seminars and practicals).

The graduate university study programme of Clinical Physiotherapy consists of six modules with 15 compulsory and 5 elective courses and the graduate thesis of 390 hours.

Five elective courses 8 % of the total program points. The decision on elective courses to be taken in the current academic year is ruled by the Scientific Teaching Council of the Faculty of Health Studies in accordance with the needs for the improvement of the teaching program.

Learning outcomes that are acquired by fulfilling individual study obligations, as well as the number of hours expected for each study obligation that ensures the acquisition of the expected learning outcomes, are listed in the description of each individual subject from the study programme.

3.9. Optimal number of enrolled students with regard to space, equipment and number of teachers

Enrolment quotas before the beginning of each academic year are adopted by the Governing Board of the University, at the proposal of the Senate, and with the consent of the competent ministry.

Students can study as full-time or part-time students.

3.10. Resources needed for conducting the study program

Teachers from the University and teachers from reference higher education institutions in academic ranks from the relevant scientific area, field, and branch participate in the implementation of the study programme. Data on the structure of teaching staff by rank and education, gender and age structure, scientific research productivity, mobility, and project activities of teaching staff are regularly monitored through the bodies from the quality assurance system. These data are processed at the level of the study programme and organizational unit, and are published in annual reports.

In terms of physical resources for the implementation of study programmes, the Faculty of Health Studies has classrooms with classic and modern audio-visual equipment, a cabinet equipped with multimedia and video equipment, a TV system, IT equipment with a maximum of two students per computer, a library - an IT center, and a microbiological research laboratory. Healthcare cabinet with simulation models and clinical skills cabinet. Clinical hospital wards with equipment for performance of health care. The Faculty of Health Studies has a Clinical Skills Cabinet equipped with highly sophisticated models - simulators.

Based on the signed cooperation agreements, the resources of other institutions are also used for the performance of the graduate university study programme of Clinical Physiotherapy: University Clinical Hospital Mostar, The Vitalis Polyclinic, the Health center Mostar, and School of Medicine of the University of Mostar.

3.11. Quality assurance of the study program

The purpose, goal, structure, operation and areas of evaluation of the quality assurance system of the University of Mostar are defined by the Rulebook on the structure and operation of the quality assurance system of the University of Mostar.

According to the Rulebook, the quality assurance system at the University of Mostar consists of permanent bodies of the quality assurance system at the university level: the Quality Assurance and Improvement Committee and the Office for Quality Assurance and Improvement. The Faculty of Health Studies is operated by the Quality Assurance and Improvement Committee, which consists of the Vice Dean for Teaching, the Quality Coordinator, and the representative of the teaching staff, the student representative, and the representative of the administrative and technical staff. The Quality Coordinator Faculty of Health Studies is also a member of the Quality Assurance and Improvement Committee. The Rulebook defines the competencies and activities of each body from the quality assurance system. Bodies from the quality assurance system carry out regular activities defined by the University Quality Assurance Manual at the University of Mostar, which relate to conducting surveys and monitoring and data processing. Based on the implemented activities, annual reports are prepared at the level of the study programme, organizational unit, and the University.
